## Data Notes

1. Refers to all CLEP test takers, military and non-military, unless otherwise indicated. Summary reports issued prior to 2006–2007 included only non-military test-taker data. This 2017–2018 summary report includes three years of data for military and non-military test-takers.
2. *Number of Test Takers* for the institution reflects the number of military and non-military candidates who sent scores to that institution at the time of testing. *Number of Test Takers* for the state reflects the number of military and non-military candidates who sent scores to all institutions within that state at the time of testing. Not all candidates opt to send their scores at the time of testing; some may elect to send scores via transcript at a later date. These data are not included in this report.
3. *Number of Exam Scores Sent* includes scores sent by military and non-military candidates at the time of testing; it does not include scores sent at a later date. The number of exam scores sent is often greater than the number of test takers because individual candidates may take more than one test.
4. The American Council on Education (ACE) recommends that institutions grant credit for scores of 50 or higher.
5. Most institutions accepting CLEP language exam scores will grant either Level 1 or Level 2 credit, depending on students' scores. These data reflect Level 1 performance only.
6. Changes were made to the registration process in order to align military and non-military test taker data for current education level and information about the testing site. This change has been accounted for in this report by adding military test takers to charts (page 3 and 6) that in the past excluded them.
