

UTSA The University of Texas at San Antonio
College for Health, Community and Policy

Bachelor of Science in Health, Aging & Society

Are you curious about **sociological and interdisciplinary perspectives** on health and aging? Are you more interested in health and aging as social problems than as biological problems? Are you passionate about **helping others** and contributing to your community?

If so, the University of Texas at San Antonio is now offering a Bachelor of Science degree in Health, Aging & Society to prepare you for careers in the growing professions of medical and health service managers and social and community service managers as well as graduate training in the fields of health and aging.

Students who major or minor in Health, Aging & Society will learn interdisciplinary perspectives on health and aging and **cultivate marketable skills** that are relevant to administration, management, and the health and social service professions, including critical thinking, problem solving, data analytics, and effective communication strategies for working in interprofessional teams.

CAREER GROWTH

According to the 2020 Bureau of Labor Statistics, medical and health services manager jobs are expected to grow 28% over the next decade - much higher than average. Median salary can be up to \$100k annually.

HCAP students turn their passions into social impact. Many of our students are high achievers from diverse backgrounds, who are the first within their families to attend college. The college recognizes that diversity brings knowledge to the table, helping to shape our world for the better from a global perspective.
