UTSA Pride Chat - Creating a SAFE Space & How language supports engagement

The goal of this chat is to assist individuals, in whatever role they may have, reflect on their current interactions and programs, and assess whether a SAFE environment exists in their space. The chat may also help staff and faculty identify ways to make their programs more inclusive to all, including adding images like the LGBTQ+ flag to flyers/websites and posters throughout offices. This chat will identify how previous lived experiences impact LGBTQ+ students, staff and faculty. Identify ways that supportive language can be added or changed to encourage inclusiveness and things to avoid saying while identifying alternate ways to communicate.
